

## Inventory of PAC suggested additions/modifications

(Values/Objectives and Indicators/Targets) To: Sept 10 to **Oct 8 2008**

| ITEM  | Requested Change   |
|---|--|
| Objective 1.1.3.1 NRV of habitat conditions         | Desire that wording be refined for better clarity of the bounds of the reference-point “natural range of variability” --- “representative mixtures” of forest composition (i.e. wetlands), + clearer connection to reverse-J curve of a fire-driven landscape.   |
| Objective 1.1.3.2 Indicator/target                  | Consider adding indicator 11/12 (open road density) as a potential means to address caribou/grizzly.   |
| Value 1.1.3 and Objective 1.1.3.2                   | Desire definition somewhere within the objectives statement to clarify meaning of “continued presence” (i.e. 1 animal per species is not an acceptable measure of “presence”). Desire ‘presence’ but also sustainable reproduction & viable population as the desired end.                               |
| Indicator/Target 7                                  | Desire definition somewhere within the target statement to clarify meaning of “species persistence” as a measurable attribute. i.e. statement of connection to species presence & resilience on a landscape over time).  |
| Objective 1.1.6                                     | “fish habitat” would merit some definition to clarify DMI election of DFO-definition as the highest scrutiny.  |
| Indicator/Target 10                                 | Suggest addition of another item within “means of achieving objective/target”: <i>Inspection of 100% of watercourse crossings at installation and decommissioning stages, plus supplemental monitoring of a sample-set (post-use period).</i>  |
| Objective 1.1.9.1 and Indicator/Targets 14,15,16,17 | Need to eliminate and merge with retention strategy, or re-describe objective and target-descriptors to improve clarity. i.e. objective: “minimize the human footprint within large burns when salvage operations occur”.  |
| Objective 1.4.1.2 Indicator/target 20               | “integration of transboundary values” - desire expansion of definition (clarity) and commitment/action beyond records and consultation, to describe DMI intent to ‘initiate’ action proposals. (i.e. special-management zone adjacent to special places?, harmonization of management plans –SFM: P/A?). |
